Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Applicant's election without traverse of Group I (claims 1-4) in the reply filed on 10/20/05 is acknowledged.

Claims 5-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/20/05.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Nam et al (Pub. No. 2004/0135941).

Note Figs. 14A and 14B which identically disclose the claimed curing method, comprising the steps of: (a) providing an article including opposing first and second substrates and an UV light curable sealant 310 for attaching the first substrate to the second substrate, wherein the first substrate 310 is provided with a light-shielding matrix 220 formed thereon, and the second substrate 110 is provided with a metallization pattern 55 formed thereon; (b) irradiating the article with light entering the article from the first substrate to reach the light curable sealant; and (c) irradiating the article with light entering the article from the second substrate to reach the light curable sealant, whereby the light curable sealant is cured by the light entering the article from the first

and second substrates wherein the steps of (b) and (c) are conducted simultaneously (paragraphs 0144-0146).

Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

The issue of interference will be considered when the 102(e) rejection is overcome by the translation of the foreign priority papers.

Any inquiry concerning this communication should be directed to Tai Duong at telephone number (571) 272-2291.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
